

## DC6113

### Slim line transom door closer

#### Application:

A slim line transom door closer that uniquely helps to meet BS 8300 and Approved Document M, ensuring buildings are accessible and inclusive to all.

Many transom door closers only achieve BS 8300 and Approved Document M at EN power size 2, and are not compliant on heavier doors.

Some manufacturers wind down the door closer and spring to EN power size 1, which doesn't provide the necessary closing force to comply with BS 8300 and Approved Document M.

The DC6113 uniquely helps to achieve BS 8300 and Approved Document M at EN power size 3, meaning heavier doors are easier to open, but still safely close.

It's also the slimmest profile on the market, perfect for aluminium slim line door sections.

#### Specification:

- Slim line transom door closer for door widths up to 950mm
- Uniquely helps to achieve BS 8300:2018 and Approved Document M at EN power size 3
- Slimmest transom profile on the market, compatible with slim line aluminium profile sections
- Highly efficient Cam-Motion® technology delivers a rapidly decreasing torque curve, which offers smooth and easy door operation for all
- Thermodynamic valves provide consistent performance, regardless of temperature
- Convenient access to the regulating valves allows closing and latching speeds to be easily adjusted
- High quality design and manufacturing at our own Italian facility
- Wide range of detachable spindle sizes; 14, 18, 20, and 24mm for flexible installation
- Retro fits the Adams Rite ARC51 and uses the same accessories, so you can upgrade with ease
- Closing speed 165° - 15°
- Latching speed 15° - 0°
- Maximum door opening angle 165° both sides
- Unhanded and suitable for left and right doors

#### Standards:

- Helps to meet BS 8300:2018 and Approved Document M at EN power size 3
- EC Cert No 0757-CPR-231-9027882-1-1
- Suitable for timber fire and smoke protection doors up to 60 minutes
- 10 year warranty

#### Finish:

- Black
