

## Access without the touch

Our work environment needs to adhere to the safety regulations and guidelines that have been put in place by the authorities. These include access systems that do not require touch-based identification.

### No Touch exit Sensor

The No Touch exit sensor is an ideal solution for entrance and exit doors with heavy pedestrian traffic. It avoids door handles being continuously touched, and so reduces viral and bacterial transmission. You simply wave a hand in front of the device, and it opens the door or gate for you

Product code: EDS-K1-1

### Features include:

- Touch free Exit Sensor
- 10cm sensing range
- Optical / Infrared Technology
- Stainless steel Plate
- User friendly
- Avoids virus transmission through touch

### *Did you know?*

*A door closer ensures the door closes behind you without the need to physically push the door.*

*This helps in the prevention of the spread of the virus and there is less need to touch doors.*

*Door closers also improve access control and security by ensuring that doors remain closed at all times.*
